

## **Consul Neowatt named No 1 Indian Power Electronics Company 2015 – SD Awards**

**Chennai, 17<sup>th</sup> December 2015:** Consul Neowatt Power Solutions today announced that it has been recognized as the No 1 India Power Electronic company (PEC) 2015 at the Soft Disk (SD) 2015 Awards, the only awards for the UPS (Uninterrupted Power Supply) Industry in India.

The award is an acknowledgment of the turnover, product range, industry leading business standards, service network & investments in R&D of Consul Neowatt. The company has been consistently ranked amongst the Top 3 Power Electronic Company at the SD awards over the last 3 years.

**Sriram Ramakrishnan, MD &CEO of Consul Neowatt Power Solutions** said, *“This award is a testimony to the huge strides that we have made in The Indian market over the last couple of years, especially, in terms of our product range. We today offer the widest power electronic product range unmatched by any manufacturer in the country. We are gaining customer acceptance and recognition for our products where cutting edge technology and features are offered with field proven robustness and reliability which are backed up by a Pan India sales and service network”*

Adding to this he also mentioned *“Our UPS and Industrial Inverter products have superior thermal design and are designed for long life even for sites with higher ambient temperatures, poor power quality, while being innovative, cost effective and energy efficient, thereby winning customer hearts.”*

The company also won awards under the Online UPS, Solar PCU and Off grid solar power solution provider.

Consul Neowatt is the only Indian company to offer a comprehensive range of power electronics products – power backup, power conditioning, energy conservation, solar and custom solutions. This includes mission critical Falcon range of UPS solutions, IORA range of Active Harmonic Filters, Sunbird range of solar PCU, Hornbill range of Static Transfer Switches and the Pelican range of Bi-directional inverters. All products have been developed in-house at Consul Neowatt’s state of the art DSIR (Department of Industrial & Scientific Research) approved R&D centre in India and are proven in exacting field conditions experienced in India.
